**TRADEPAQ ANNOUNCES A
RELEASE STRATEGY FOR
INTEGRATED SOLUTIONS FOCUSED
ON INFOR ERP LN USING SERVICE
ORIENTED ARCHITECTURE (SOA)**

**TRADEPAQ ENTERPRISE DOCUMENT MANAGEMENT (EDM) SOLUTION
PROVIDES INTEGRATED DOCUMENT GENERATION AND PREPARATION
FOR INFOR ERP LN**

NEW YORK CITY, July 1, 2007 – TRADEPAQ Corporation a leading provider of document, integration and financial supply chain solutions announced today a new release strategy for INFOR ERP LN.

TRADEPAQ:Enterprise Document Management (EDM) has established itself as an industry leader for document and output management in the INFOR ERP LX and BPCS space. Documents have evolved into multiple formats from the traditional print or Fax. Currently emails, secure XML messages, scanned images and PDF images on the internet have become an equal standard. It has become essential to generate and manage all of the required documents for a business transaction. Corporations are realizing that collaboration, financial supply chain management and enterprise content are critical components of any business wanting to remain competitive. Poor communication can cost an enterprise in erroneous deliveries, lost profits, missed sales opportunities, penalties and uncollected cash.

EDM can prevent setbacks and create efficiencies by determining which documents to produce, how they are to be populated and transmitted, and where documents are to be distributed and stored, based on the rules of the enterprise. The total EDM solution provides document preparation, generation and delivery as well as workflow, compliance, imaging, archive and retrieval. Implementation case studies have shown significant service improvement, cost reduction, new market expansion and better cash flow.

Today TRADEPAQ has announced a strategy to release an integrated solution focusing on INFOR ERP LN using Service Oriented Architecture (SOA). Service Oriented Architecture (SOA) is a business-centric IT architectural approach that supports integrating your business as linked, repeatable business tasks, or services. The SOA architecture is embraced by Infor and all main technology companies.

TRADEPAQ:EDM is built on the latest J2EE technology platform, providing a powerful technical framework to integrate with INFOR ERP LN. This combined with a 'no limitation' strategy makes the EDM suite the best choice for document generation, preparation and distribution on INFOR ERP LN.

TRADEPAQ solutions are used by fortune 2000 manufacturers in industries such as paper, chemical, food, metals, pharmaceutical, electronics and automotive products in more than 24 countries worldwide. Headquartered in New York City, TRADEPAQ operates in offices throughout Europe, Pacific / Asia and South America.
