BPCS.enable by TRADEPAQ™

BPCS.enable by TRADEPAQ provides enterprises running BPCS CD, CD Euro (4.05) and Plant Maintenance with the ability to protect and enhance their investment in BPCS (Business Planning and Control System) by integrating e-commerce into their business practices (i.e. collaborative commerce,

e-procurement, business intelligence and Customer Relationship Management (CRM) capabilities). Thus, they can assume the productivity gains, profitability increases and competitive advantages brought about by e-commerce. TRADEPAQ has been an SSA partner for over six years,

working worldwide with all versions of BPCS. By helping to expedite deliveries, eliminate errors and reduce response times, we help our clients improve interactions with their business partners, whether customers, vendors, or employees. For optimum client support, TRADEPAQ has office locations on six

continents, a library of 200+ pre-built templates mapped to BPCS and documents in over 22 languages. To learn more, please contact us at: info@tradepaq.com.

BPCS.enable is designed to web-enable any BPCS green screen application. Once enabled, enterprises can communicate information via the Internet, an intranet, and wireless handheld systems. TRADEPAQ's solutions provide a facilitated conversion to the web with the use of our pre-built screen templates, intelligent workflows, and scripting capability. Customizable screens support the unique requirements of clients, while automated workflows provide the ability to bypass screens, and point-and-click capability deliver the correct information instantaneously-for true on-demand information.

- Combine Screens
- Run Scripts
- Link Multiple Applications
- Build Macros
- ODBC/JDBC Calls
- Image Links
- XML Messaging
